

**CONCEPTUAL SOLUTIONS TO REDUCE
BASE GAS REQUIREMENTS
IN SALT DOME CAVERNS**

by

**Harry Allison

I. INTRODUCTION

We will attempt to define solutions to reducing the base gas requirements in salt dome caverns in conceptual terms. The caverns can provide a wide range of options to the user, but usually there will be trade offs. This paper will explore the options and the trade offs. This paper is not intended to be a cookbook, "how-to-do," but a generalized discussion.
