ENSUING HYDROCARBON STORAGE REGULATIONS IN TEXAS

**By J. J. Hardgrave
Texas Utilities Fuel Company**

ABSTRACT

The April 1992 storage accident near Brenham, Texas prompted numerous state and federal agency inquiries into the safety of such facilities. The Texas Railroad Commission now prepares for final adoption of new regulations scheduled to be implemented by year end. This paper will focus on the development of these new regulations, their substance, and the potential implications to the domestic industry.

**PRESENTED AT THE SOLUTION MINING RESEARCH INDUSTRY FALL MEETING
Lafayette, Louisiana - October 24-27, 1993**
