

SalGas validation and Benchmark

Yvan Charnavel, GDF-SUEZ, Paris, France

Tom Eyermann, Consultant, Rapid City, USA

Abstract

The paper presents the results of modeling two case histories of cavern development with SalGas and four other solution mining models. The results of each model are compared to SalGas and recommendations for the use of SalGas are made.

Key words: Cavern Dissolution Modeling, Computer Software, Cavern Design, Cavern Development
